Scoring

Letters	1-5 letters: 0. 6-8 letters: word length. 9 letters: 18.
Numbers	Exact target: 10. Error ≤ 5: 7. Error ≤ 10: 5.
Conundrum	First correct answer scores 10. A wrong guess disqualifies that player. If scores are tied, play another conundrum.

Round notes

1. The middle column is optional. Use it for selected letters, the six numbers and target, or the conundrum if you want a full record.
2. The arrow shows whose round it is. That player chooses the letters or numbers and declares first.
3. For letters, use any of the letters. If both players declare the same length, both valid words score.
4. For numbers, use any of the numbers. Only the closest valid result scores. If both players are equally close, both score.
